## **CERTIFICATE OF COMPLIANCE**

### **Reduction of Toxics in Packaging**

To Whom It May Concern:

This certifies that packaging supply products sold by Marfred Industries are in compliance with respect to the Toxics in Packaging Prevention laws; namely, that the restricted metals (lead, cadmium, mercury and hexavalent chromium) are not intentionally added to any packaging component during the manufacturing process.

We further certify that the sum total of concentration levels of lead, mercury, cadmium and hexavalent chromium present in any package or package component does not exceed 100 parts per million by weight.

In addition, as to recycled resins that are incorporated into our packaging supplies, no MSDS sheets that we have received from any supply manufacturers indicate the presence of any of the aforementioned chemicals.

Respectfully,

Richard B. Cohn  
Sr. Vice President & General Manager
